Skills

Python	Intermediate
SQL	Intermediate
Exploratory Data Analysis (EDA)	Intermediate
Geospatial Analytics	Intermediate
Machine Learning	Intermediate
VIIRS Night-Time Data	Intermediate
Django	Intermediate
Flask	Intermediate

VISHNU M

Professional Summary

Data-driven professional with one year of hands-on experience in data science, analytics, and backend development. Proficient in Python and SQL for building data pipelines and performing exploratory analysis. Demonstrated expertise in translating complex datasets into actionable insights through statistical analysis and visualization. Eager to contribute analytical skills and problem-solving abilities to drive data-informed decision-making in a collaborative environment.

Professional Experience

Associate Data Scientist Dec 2024 - Nov 2025
Ai Spry | Chennai

Client: North Western Railways

- Built an end-to-end audio intelligence system leveraging Google Gemini 2.5 Pro to transcribe Hindi railway announcements, identify operational keywords, and generate timestamps + frequency metrics for real-time insight.
- Designed an automated audio preprocessing and transcription pipeline powered by FFmpeg (PCM mono conversion), SpeexDSP (audio enhancement), and Pydub (chunking) orchestrated via cron jobs for continuous processing.
- Integrated AWS S3 for scalable audio storage and PostgreSQL (AWS RDS) for structured metadata and analytics, enabling fast search, tracking, and audit of announcements.
- Skills: Python, Flask, FastAPI, React, JavaScript, AWS S3, AWS EC2, PostgreSQL, Google Gemini, Speech-to-Text, Keyword Spotting, Audio Processing (SpeexDSP)

Associate Data Scientist Dec 2024 - Nov 2025
Ai Spry | Chennai

Client: NCSI Oman (National Centre for Statistics and Information)

- Performed on-site Exploratory Data Analysis (EDA) on Oman Tax Authority datasets, generating automated profiling reports using Sweetviz, computing correlations and mutual information to uncover key drivers of demographic consumption patterns.
- Processed VIIRS night-time satellite imagery in QGIS, using Oman shapefiles, raster clipping, and masked extraction (H23V06 tiles) to isolate the country's night-light intensity zones.
- Computed zonal statistics to quantify illumination levels across administrative regions, enabling predictive modelling of household income and expenditure using night-light intensity as a socio-economic proxy.
- Skills: Python, QGIS, VIIRS Night-Time Data, Geospatial Analytics, EDA, Machine Learning

Backend Developer

Jul 2024 - Aug 2024

Saturn Pyro | Chennai

- Developed modules for MyESG Online, a web-based platform enabling organizations to record and manage Environmental, Social, and Governance (ESG) metrics and compliance data.
- Implemented user authentication, role-based access, and ESG data submission workflows using Django, ensuring secure onboarding and structured data capture.
- Integrated AWS S3 for reliable storage of ESG documents and evidence files, enabling scalable.

Data Science Intern

Feb 2024 - Jun 2024

Excel R | Bangalore

Education

B.Tech. - Artificial Intelligence and Data Science

- May 2024

Anna University, KCG College of Technology

GPA: 8.34
